

RANDALL'S ADVENTURE & TRAINING SEARCH AND RESCUE (RAT-SAR)

RAT-SAR is a private, non-profit, non-government, specialized search, rescue, and training organization incorporated under the laws of the State of Alabama.

RAT-SAR is founded on the principle of self-sufficient, mobile teams trained to operate in remote wilderness, high angle, natural subterranean, flood / swift water, and other austere environments.

RAT-SAR is comprised of team members with extensive training in technical rope rescue, cave rescue, wilderness search, wilderness medicine, and disaster relief.

RAT-SAR is a 501(c)(3) organization, fully licensed, insured and ready to assist any agency, within the bounds of its charter, as a public service.

The RAT-SAR team stands ready to assist AHJs (Authorities Having Jurisdiction) with the following:

- Wilderness Land Search
- Backcountry Technical Rescue
- Cave Rescue
- Swiftwater / Flood Rescue
- Natural Disasters
- Team Training

RAT-SAR maintains equipment to support search, rescue and patient evacuation operations. Each member carries personal equipment adequate to ensure self-sufficiency in both underground and above ground environments for extended periods of time.

RAT-SAR is not an Emergency Medical Agency, although many of its members are licensed medical responders. Our mission is locating, accessing, stabilizing, and safely transporting patients to higher level of EMS care.

RAT-SAR does not self-dispatch. Individuals needing assistance with an emergency should contact 911. An AHJ should contact the RAT-SAR Team directly to request assistance:

(256) 485-5114 (voice and text)
